

DJ RYAN ASH — TECHNICAL & HOSPITALITY RIDER

Artist Contact: djryanash@me.com

Website: www.djryanash.com

1. TECHNICAL REQUIREMENTS (PLAYBACK SETUP)

The promoter/venue agrees to provide the following equipment in full working order, fully set up and tested prior to soundcheck/performance:

- **Media Players:** 2× Pioneer CDJ-3000 (Acceptable alternative: Pioneer CDJ-2000NXS2)
 - **Mixer:** 1× Pioneer DJM-A9 or DJM-900NXS2 (Acceptable alternative: Pioneer DJM-V10)
 - **Network Links:** All CDJs and Mixer must be network-linked via a standard LAN Cat5/Cat6 Ethernet hub for Pro DJ Link functionality.
 - **Master Connections:** Unrestricted access to mixer inputs/outputs (XLR / Digital) for audio output routing.
-

2. BOOTH ENVIRONMENT & MONITORING

- **Monitors:** 2× high-powered, professional DJ booth monitor speakers (e.g., d&b audiotechnik, Meyer Sound, QSC) placed at ear level on the left and right side of the booth. Booth volume must be independently controllable directly from the mixer.
 - **Performance Surface:** A stable, level, and rigid DJ desk/table set to standard performance height (~95–100 cm / 38–40 inches) with zero vibration or movement.
 - **Power:** Minimum 4× grounded AC power outlets easily accessible within the booth area.
-

3. HOSPITALITY RIDER

Please ensure the following items are stocked in the DJ booth prior to performance start time:

- 4× 500ml Bottled Still Water (chilled)
 - 2× Cans of Red Bull (chilled)
 - 1× Clean, dry black hand towel
-

For any technical setup modifications or equipment substitutions, please contact management in advance.
